DETAILED ACTION

Allowable Subject Matter

1. Claims 1-11 are allowed.

The following is a statement of reason for the indication of allowance: As the applicant stated in the remark filed on 12/4/2006.

Applicant's independent claims 1, and 6: The present in invention is directed to a method of sharing a program using target board identification (IDs) in a mobile communication system. Each independent claims identify the patentably distinct feature "a main processor a target board ID of each target board; initializing target board hardware according to the target board ID, and initializing by a main processor an operating system (OS) for each target board using the target board ID; and branching by a main processor into a sub-routine for each target board according to the target board ID and executing by a main processor an application program for the target board, and storing by a main processor a master execution file in a memory, said master execution file compiled to contain program code to operate a plurality of target boards of the mobile communication system, said main processor apart from said plurality of target boards". Applicant's independent claims 1, and 6 comprise a particular combination of elements, which is neither taught nor-suggested by prior art.

Applicant's independent claim 11: The present in invention is directed to a system for sharing a program in a mobile communications system having a control unit and a plurality of target boards, the independent claim identifies the patentably distinct feature "the control unit includes a main processor for; executing the execution file for
